The PREFACE.

MY Profession obliging me to be conversant with *Mathematical Books*, (the Printing whereof, and *Music*, have been my chiefest Employment) I have observed two Things, many times the Cause why Books of this Nature appear abroad not so correct as they should be; either, 1. Because they are too much hastened from the Press, and not Time enough allowed for the strict and deliberate Examination of them; which in all Books ought to be done, especially in these, for as much as one false Figure in a *Mathematical Book*, may prove a greater Fault than a whole Word mistaken in Books of another Kind. Or, 2. Because Persons take Tables upon Trust without trying them, and with them transcribe their Errors, if not increase them: Both these I have carefully avoided, so that I have Reason to believe (and I think I may say it without Vanity) there never were Tables more exactly printed than in this Book.

The *Perpetual Almanack* was the ingenious Invention of that Improver of Arts, and Encourager of Artists, Sir S. A. M. O. R. L. MORELAND.

In the former Editions of this Book, I only inserted the first three Tables for finding the *Day of the Month*; but in this, I have added five other Tables, for finding the *Movable Feasts* and *Terms* for any Year past, present, or to come.

I have also in this Edition added Directions relating to the Purchasing and Measuring Land, the *Principal Fairs in England and Wales*, a Table of the *Sun's Place*, Monthly Directions relating to *Gardening*, a Table of the *Affairs of Bread*, a Comparison of *Foreign Weights and Measures* with the *English*, by the late famous Sir JONAS MOORE, Sen. The Reduction of *English Money*, with the *Weight and Value* of divers Foreign Gold and Silver Coins; enlarged the Table for ready casting up of *Money*, as likewise those for *Interest, Rebate, and Annuities*; and whereas, in the former Impressions the Parts of a *Penny* were expressed in *Decimal Fractions*, I have reduced them into *Farthings*, which though they cannot be so exact, yet are more easy to be understood, and do not differ from the Truth half a *Farthing*; as also a Table for the casting up of *Portugal Money*, now current here, likewise, for *Guineas and half Guineas*. The Roads which were very deficient, are now compleat, and put in a better Method than any yet extant, the *County and Hundred, Lath, Ward or Wapentake*, being added, whereby may be seen through what *Counties* each Road lies, and through what *Divisions* of such *Counties*; and lastly, I have added a Catalogue of all the *Counties, Cities, Corporations, and Borough Towns* in *England and Wales*, with the Number of *Knights, Citizens, and Burgeses*, chosen in each to serve in Parliament.

To conclude, you will find nothing in this Book but what is very useful; according to the Truth of which, you may approve or dislike the Endeavours of,

Your Servant,

John Playford.

The even Hundreds are to be found at the Top of the Table, having their Dominical Letters over them, as 1700, 1800 has C; 1800, 2200, E, &c. The Parts of every Hundred are to be found in the Side, and have their Dominical Letters against them, as 1, 29, 57, 85 have B, D, F, or G; 2, 30, 58, 86, A, C, E, or F, according to which Century of Years they belong; and so for the rest. To find the Dominical Letters for even Hundreds and Parts, the Rule is; Seek the Hundreds in the Top, and the Parts in the Side, and in the Angle of Meeting is the Dominical Letter or Letters; so the Dominical Letter for 1753 is G, for 1754 F, 1755 E, 1756 DC, it being Leap-Year; D being used till February 25, and C all the rest of the Year.

Having, by the last Table, found the Dominical Letter for any Year you desire, underneath it in this Table you have the Day of the Week each Month begins on throughout the Year; as the Dominical Letter for 1763, being found to be B, under B you find *Satur. Tuesd. &c.* find against them on the left Side *Jan. Feb. &c.* which shews the first of *January* is on a *Saturday*, the first of *February* on a *Tuesday*, &c. If it be Leap-Year, and has two Dominical Letters, you must use the first Letter only for *January* and *February*, and for the other Months the second Letter. As the Dominical Letters for 1764, A G, A shews only that *January* begins on *Sunday*, and *February* on *Wednesday*, but G shews the Beginnings of all the rest: The Figures with each Month shew the Number of Days, but in Leap-Year, *February* has 29 Days.

Having, by the two former Tables, found what Day of the Week the Month begins, this Table readily shews the Day of the Month. Example, The first of *February*, 1763, is on a *Tuesday*, and I would know what Day of the Month the third *Friday* in that Month is? I seek for the Square in this Table that begins with *Tuesday*, and in that Square look for *Friday*, and against it I find 4, 11, 18, 25; which are all the *Fridays* in that Month, the third answering the Question, being the 18th Day of the Month. Again, What Day of the Week is the 16th of *April* 1764. By G the Dominical Letter, for the latter Part of the Year, I find in the preceding Table that *April* begins on *Sunday*, and looking in that Square in this Table, I find the 16th Day *Monday*.

The Prime by the Table is found after the same Manner as the Dominical Letter; the even Hundreds are to be sought for at the Top, and the Parts on the Side of the Table; and when the Number of Years sought consists of Hundreds and Parts, then the Angle of Meeting shews the Prime. Example, What is the Prime for the Year 1763? I seek for 1700 at the Top, which I find in Page 5; underneath which, and against 63, I have 16 the Prime desired. But without the Table, this is the Rule: Divide the Year of our Lord by 19, and to the Remainder after Division add 1, and the Sum is the Prime for that Year. So 1764, divided by 19, leaves 16, to which adding 1 makes 17, the Prime for 1764: And in the Table under 1700, and against 64; you will find the Prime for that Year to be 17, as before.

Having found the Dominical Letter and Prime for any Year you desire, seek for the Prime in the Square next the Dominical Letter, and in a straight Line to the Right Hand under from Christmas to Shrove Sunday, you have the Weeks and Days from Christmas to Shrove Sunday; and under Shrove Sunday, the Day of the Month Shrove Sunday happens on; and in the last Column (under the Title Easter Day) you have the Time of Easter. Example, For 1763 the Dominical Letter is B. and Prime 16; I seek for 16 against B, and in that Line find 7 Weeks 1 Day, the Time between Christmas and Shrove Sunday, and that Shrove Sunday is on February 13, and Easter Day on April 3, for that Year. If, in the Bissextile Years, Shrove Sunday shall fall in February, as it will always do if Easter Day fall upon, or before, the 18th of April, then the former of the Dominical Letters for that Year is to be used for finding Shrove Sunday; but if Easter Day (which is always to be found by the latter of the two Letters) falls after the 18th of April, then Shrove Sunday falls in March, and is to be found by the same Letter.

N. B. When the Dominical Letters are DC, and the Golden Numbers 1, 9, 12, or 17, Shrove Sunday will fall on the 29th Day of February.

This Table is but a Continuation of the former, and after the same Method shews Rogation Sunday, Ascension Day, Whitsunday, Trinity, and Advent Sunday. Example: For 1763, B being the Dominical Letter, and 16 the Prime, shews Rogation Sunday is on May 8; Ascension Day, May 12; Whitsunday, May 22, &c. Again, 1764, the Sunday Letters (it being Leap-Year) are A G, but the former serving only till February 25, I take G, and seek for the Golden Number 17 against it; and guiding my Eye to the Right Hand, find Rogation Sunday to be on May 27, Ascension Day on May 31, Whitsunday on June 10, &c. In the same Manner, by the next Table, you may find the Moveable Terms for ever. Example: In 1764, Easter Term begins May 27, and ends June 4; and Trinity begins June 22, and ends July 11.

The preceding Tables, as their Titles express, are for finding the Moveable Feasts and Terms from the Year 1753 to the Year 1899, both inclusive; but as the Times of those Feasts and Terms may, on many Occasions, be wanted to be known prior to the Year 1753, the following Tables are retained for that End, with Examples of the Use of them; which is in every respect in the same Manner as the others, except that the Dominical Letter of the Julian is used (and the Tables following that wherein it is found) instead of that of the Gregorian, the Golden Number being the same in both Accounts.

To find the Sun's Place for any Day in any other Year.

For the first after Bissextile, till the End of February, add 46' to the Sun's Place on the same Day in the Bissextile Year; and after February, for the rest of the Year subtract 14 $\frac{1}{2}$, and the Result in both Cases will be his Place for the Day required, Example, Let the Sun's Place on the 20th of February 1757, (being the first Year after Bissextile) be required. The Sun's Place on the 20th of February in the Bissextile Year 1756, is $21^{\circ} 76'$, to which add 46', according to the former Part of the Rule, and it makes $21^{\circ} 2'$ the Place of the Sun sought, on the 20th of February 1757. Again, if the Sun's Place should be required for the 25th of March in the same Year 1757. From his Place for the same Day 1756, $5^{\circ} 17'$ subtract 14,

According to the latter Part of the Rule, and the Remainder 11, 50, 3, is the Answer sought. For any Day in the second Year after Biffextile, it is only subtracting 14 $\frac{1}{2}$ from the same Day in the First; and in the third Year, subtracting 14 $\frac{1}{2}$ from the same Day in the Second, and you will have the Sun's Place at any Time desired. And to continue the Sun's Place for the Biffextile Years, if 1', 49" is added to the Sun's Place in the preceding, it will give his Place on the same Day in the following Biffextile Year. But, to prevent Fractions, add 2' for the first following Leap Year, 3' for the Second, 5' for the Third, 7' for the Fourth, and 9' for the Fifth. And, by this Method and the foregoing Rules, the Sun's Place may be found tolerably exact for a long Time.

*Directions relating to the Purchasing and
Measuring of Land.*

First, see the Land which thou intend'st to buy,
Within the Seller's Title clear doth lie :
And that no Woman to it doth lay Claim,
By Dow'ry, Jointure, or some other Name,
That may it 'cumber. Know if bound or free
The Tenure stand, and that from each Feoffee
It be releas'd ; That the Seller be so old
That he may lawful sell, thou lawful hold :
Have special Care that it not mortgag'd be,
Nor be entailed on Posterity.
Then if it stand in Statute bound or no,
Be well advis'd what Quit-Rent out must go,
What Custom Service hath been done of old,
By those who formerly the same did hold ;
And if a wedded Woman put to Sale,
Deal not with her unless she bring her Male ;
For she doth under Covert Baron go,
Altho' sometimes some traffic so (we know).
Thy Bargain being made, and all this done,
Have special Care to let thy Charter run
To thee, thy Heirs, Executors, Assigns,
For that beyond thy Life securely binds. [vent
These Things foreknown and done you may pre-
Those Things rash Buyers many Times repent.
And yet when you have done all that you can,
If you'll be sure, deal with an honest Man.

*Note : That for the measuring of Land, it is measured
by the Pole, Perch, or Rod, which is usually 16
Foot and a half long ; and, according to the Statute,
4 Poles in Breadth, and 40 Poles in length make an
Acre, from which is made this Table following.*

A Table, whereby any one may suddenly know (without any Use of Multiplication, save only by adding a Cypher or Cyphers, to the Sums contained therein) how many 4 Pences, 2 Pences, Pence, Half-pence, Farthings, and Half-farthings, are contained in any Number of Shillings or Pounds whatsoever.

Shillings	4 Pence	2 Pence	Pence	Half-pence	Farthings	Half-farth
1 contains	3 or	6 or	12 or	24 or	48 or	96
• 2 ———	6	12	24	48	96	192
• 3 ———	9	18	36	72	144	288
• 4 ———	12	24	48	96	192	384
• 5 ———	15	30	60	120	240	480
• 6 ———	18	36	72	144	288	576
• 7 ———	21	42	84	168	336	672
• 8 ———	24	48	96	192	384	768
• 9 ———	27	54	108	216	432	864
• 10 contain	30	60	120	240	480	960
• 11 ———	33	66	132	264	528	1056
• 12 ———	36	72	144	288	576	1152
• 13 ———	39	78	156	312	624	1248
• 14 ———	42	84	168	336	672	1344
• 15 ———	45	90	180	360	720	1440
• 16 ———	48	96	192	384	768	1536
• 17 ———	51	102	204	408	816	1632
• 18 ———	54	108	216	432	864	1728
• 19 ———	57	114	228	456	912	1824
• 20 contain	60	120	240	480	960	1920

By adding one Cypher to any Number, you may increase the Value thereof 10 Times, by adding two, 100 times, by adding three, 1000 Times, by adding four, 10000 Times, &c. As for Example, if you add a Cypher to 48, which is the Number of Farthings that are in a Shilling, you may know thereby the Farthings that are in 10 Shillings; if you add two Cyphers to 48, you may know the Farthings which are in 100 Shillings, &c.

<i>George I.</i>	1660	1714 <i>Aug. 1</i>	12 10	<i>Hanover.</i>
<i>George II.</i>	1683	1727 <i>June 11</i>		

By this *Regal Table*, may easily be found the Year of each King's Reign corresponding to the Year of our Lord, always remembering to begin the Year of our Lord on *January 1*, and adding 11 Days to reduce it to the New Style.

Example.

I have a Deed bearing Date the 17th of *May* in the Two and Twentieth Year of the Reign of King *Charles* the Second, but the Year of our Lord is omitted; I desire to know in what Year of our Lord the Deed was made?

I find by this Table, that King *Charles* the Second began his Reign the 30th of *January* 1648; from whence I conclude that the 17th of *May*, in the first Year of his Reign must be in the Year of our Lord 1649, which proves by Consequence, that the 17th of *May* in the Two and Twentieth Year of his Reign, must be in the Year of our Lord 1670.

Directions what is to be done each Month in the *Orchard*, *Kitchen*, and *Flower Gardens*.

JANUARY.

Orchard and Kitchen-Garden.

BARE the Roots of your Fruit Trees, and if the Weather be open, lay good Dung to them. Gather your Cyons for Graft, before the Buds sprout, and cleanse your Trees from Moss. Plant Quicksets. Transplant young Fruit Trees, and prune the old towards the Decrease of the Moon. Set young, and prune your old Vines. Begin to nail and trim your Wall-Fruit. Set Beans and Pease. Sow Lettuce, Chervil, Spinage, Radish, and other Sallading in hot Beds. Turn up your Bee-Hives, and sprinkle them with a little warm and sweet Wort.

Flower-Garden.

PRESERVE your best Gilliflowers, Auricula's, early Anemonies, and Ranunculus's, from too much Wet, Frost, or Snow; as likewise your Carnations, and such Seeds as are liable either to be washed away, or over-chill'd, by covering them, and striking off the Snow where it lies too thick. About the Middle of this Month, if you plant your Anemomy

mony Roots and Ranunculus's, they will be secure without covering. Keep your Conservatory, where your Greens and nice Plants are housed, close shut, except to let in the Sun; and if it freeze extremely, keep a small Fire of Charcoal therein. Set up Traps for Vermin; and towards the End of the Month, earth up with fresh and light Mould the Roots of such Auricula's as have been uncovered by the Frost.

F E B R U A R Y.

Orchard and Kitchen-Garden.

BEGIN to graft Apples, some Pears, Plumbs, Cherries, &c. Cover the Roots of those Fruit Trees, the last Month left bare, and prune such of your Fruit Trees and Vines as could not be done then; for this Month is most proper to bind, plash, nail, and dress, because less subject to Frost. Be still cleansing your Trees from Moss, and take off the Webbs of Caterpillars from the Tops of Twigs, Plants, Vines, Hops, &c. Set all Sorts of Kernels and stony Seeds. Sow and set all Sorts of Asparagus, Radish, Corn fallads, Parsneps, Carrots, Onions, Garlicks, Marigolds, &c. Plant Cabbage Plants, Potatoes. Parsley, Spinage, and other hardy Potherbs, Steep Mellon and Cucumber Seed in new Milk 24 Hours, and sow them in a hot Bed, keeping the Bed covered till they appear, and then uncover it in clear and Sun-shine Weather, but cover it again at Night. Still keep close your Conservatory, watering the Roots of your Orange and Lemon Trees, &c. with Water, wherein has been Sheep's Dung steeped in the Air or Sun, for two or three Days, taking care not to wet the Leaves, lest you destroy your Plants.

Flower-Garden.

Secure your choice Flowers in Beds with Tiles as soon as they appear above Ground. Air your housed Carnations in warm Days and mild Showers, setting them in again at Night. Sow Auricula Seeds in good mellow Earth. Plant Anemonies for latter Flowers. Sow Larkspurs, &c. Plant your Boxes sown with choicest Seeds where they may be secure from sharp Winds and violent Rains.

M A R C H.

Orchard and Kitchen-Garden.

GRAFT all this Month, except the Spring prove extraordinary forward, and take heed to graft your Cyon on that Side of the Stock which is least exposed to the South-West Wind, and

careful that the Rain get not into the Clefts of your young grafted Stocks. Stake and bind up weak Scrubs and Plants. Plant Peaches and Nectarines early, not cutting off the Tap-roots, as in other Trees. Prune last Year's Grafts, and cut off the Heads of your budded Stocks. Top your Rose Trees near a Leaf-bud with your Knife, and cut off the dead withered Branches. Slip and set Sage, Thyme, Rosemary, Lavender, &c. Sow Endive, Succory, Leeks, Radish, Beets, Parsneps, Parsley, Correl, Skirrets, Bugloss, Barrage, Chervil, Celery, Mallage, Alifanders, &c. in the Beginning of the Month. Sow also Lettuce, Onions, Garlick Purshain, Turneps, Carrots, Cabbages, Pease, Cresses, Fenel, Marjoram, &c. Transplant Medicinal Herbs. Cover your Melon Plants with Bell Glasses, till you remove them. String your Strawberry Beds, and uncover your Asparagus, which you may now transplant to make new Beds. By this Time the Bees therefore keep them close Night and Morning, if the Weather prove ill.

Flower Garden.

Plant Box, &c. sow Pinks, Sweet Williams, Carnations, Wall-Flowers, Stock-Gilliflowers, French Honey-Suckles, Primroses, Cowslips, Lark-spurs, Indian Scabious, &c. In your hot Beds sow African Marygolds, Amaranthus, Nasturtium Indicum, the sensible and humble Plants, &c. African Marygolds, and Nasturtium Indicum, will come up in a cold Bed. Transplant Gilliflowers, and other fibrous rooted Plants, new earthing up those unremoved. Cover your choicest Tulips. Sow Stock-Gilliflowers at Full Moon, to produce double Flowers. Towards the latter End of the Month, if the Weather be not too cold, you may open the Windows of your Conservatory, and by degrees harden your Greens to bear the Air.

A P R I L.

Orchard and Kitchen Garden.

SOW Sweet Marjoram, Hyssop, Basil, Thyme, Winter-Savory, Scurvy-Grafs, Lettuce, Purslain, Gilliflowers, Radishes, Marygolds, &c. Set slips of Artichokes, Lavender, Thyme, Penny-Royal, Sage, Rosemary, &c. Set French Beans, and sow Turneps. Towards the middle of the Month, begin to plant forth your Melons and Cucumbers. Gather up Worms and Snails (all Summer) after Evening Showers.

Showers. Open your Bee-Hives for now they hatch: Look carefully to them, and prepare Hives, &c.

Flower-Garden.

Continue hot Beds, for such exotick Plants as will not arrive to Perfection without them, 'till the Air and common Earth be endowed with sufficient Heat to preserve them abroad. Transplant such fibrous Roots as you had not finished in *March*; as Violets, Hepatica, Primroses, &c. Shelter your seeding Auricula's from the Sun. Take out your *Indian* Tube-roses, parting the Off-sets carefully, lest you break their Fangs; then put them in natural (not forced) Earth, placing a Layer of rich Mould beneath, and about them natural Earth, to nourish the Fibres, but not to touch the Bulbs; then plunge your Pot in a hot Bed moderately warm, and give them no Water 'till they spring; then set them under a South Wall; in dry Weather water them freely, and expect an incomparable Flower in *August*. Set out Flos Cardinalis, slip and set Marums. Water Anemonies, Ranunculus's, and Plants in Pots, once in two or three Days, if Drowth require it. Preserve your best Tulips, Ranunculus's, Anemonies, and Auricula's from Storms of Rain or Hail, and the parching Rays of the Sun. In fair Weather you may venture to expose some of your tender Shrubs, but your Oranges may be left in till next Month. You may now graft Oranges, Lemons, Pomegranates, Jessamines, &c. Mow Carpet-Walks, and ply Weeding and Hawing.

M A Y.

Orchard and Kitchen-Garden.

IF you find your Buds ready you may inoculate. Sow Purslain to have it young, Lettuce, large sided Cabbage, &c. Look carefully to your Melons, and towards the End of the Month uncover them. Set your Bees at Liberty, and expect Swarms,

Flower-Garden.

Bring your Oranges forth; transplant and remove them. Transplant Amaranthus, Flos Africanus, Nasturtium Indicum, Mirabilia Peruviana, &c. from your hot Beds into good and rich Soil, as much as may be in the Sun. Give all your housed Plants (which you do not remove) fresh Earth at the Top, loosening the rest with a Fork, taking great Care that you hurt not the Roots, and cleanse them from the

the Dust they have contracted in the Conservatory. Plant your Stock-Gilliflowers in Beds at Full Moon, and shade your Carnations and Gilliflowers after Mid-day. Gather your Anemony Seeds as the Dew rises, and preserve them dry. Cut the Stalks of such bulbous Roots as you find dry. Sow not any Aromatic Herbs.

J U N E.

Orchard and Kitchen-Garden.

Cleanse Vines of Exuberant Branches and Tendrels, stopping the Joint. Inoculate Peaches, Apricocks, Plumbs, Apples, Pears, &c. Gather Herbs at the Full Moon to keep, dry them in the Shade. Sow Lettuce, Chervil, Radish, &c. Distil Aromatic Plants. Look to your Bees for Swarms and Casts. Destroy Insects.

Flower-Garden.

Transplant Autumnal Cyclamens. Take up Iris Chalcedon. Gather the ripe Seeds of your choicest Flowers, and preserve them dry. Take up your best Anemonies, Tulips, and Ranunculus's (the Stalks being withered) after Rain, and dry the Roots well. Lay Gilliflowers, which will take root in six Weeks, and be ready to transplant into a light loamy Earth; you may plant six or seven in a pot; but be careful to keep them from too much Rain. Slips of Myrtle, set in a cool and moist Place, do now frequently take Root. Such Gilliflowers as are now blown, keep for Seed, letting them have but a few Layers to nourish, and but few Buds; but save not any for this Purpose that break their Pods; preserve them from Wet as much as you can.

J U L Y.

Orchard and Kitchen-Garden.

Water your planted Trees and Layers, prune Apricocks and Peaches, saving as many of the young likeliest Shoots as are well placed. Cleanse your Wall Fruit from superfluous Leaves. Stop the exuberant Shoots of Vines at the second Joint. Remove your large fided Cabbages planted in May to head in Autumn. Let such of these Garden Herbs as you would save, run to Seed. Sow latter Pease, Lettuce, Chervil, Radish, &c. for young Sallading. Keep Weeds from growing to Seed, and

and begin your Hawing. Gather the Snails from your Wall-Fruit, but pull not off the bitten Fruit, for then they will begin with others. Straiten the Entrance of your Bee-Hives, and help your Bees to kill Drones, Wasps, &c. by setting Glasses of Beer mingled with Honey for them.

Flower-Garden.

SLip Stocks and other ligneous Plants and Flowers. From hence forth to *Michaelmas* you may lay Gilliflowers and Carnations, for Increase: You may also lay Myrtles, Laurels, Jessamines, and other Greens. Clip Box after Rain. Water your planted Shrubs and Layers. Take up early Autumnal Cyclamens and transplant them. Gather early Cyclamen Seed, and sow it presently in Pots. The latter End of the Month sift your Beds for Off-sets of Tulips, and for Anemonies, Ranunculus's, &c. You may sow Anemony Seeds, keeping them temperately moist.

AUGUST.

Orchard and Kitchen-Garden.

Inoculate early, if you begin not sooner. Prune off superfluous Branches and Shoots of the second Spring. Pull up the Suckers. Clip Roses that have now done bearing. Sow Cabbages and Colliflowers for Winter Plants, Corn Salad, Lettuce, Marigolds, Carrots, Parsneps, Turneps, Spinnage, Onions, curled Endive, Angelica, Scurvy-Grass, and such Plants as endure Winter. Pull up ripe Onions and Garlick, &c. Transplant such Lettuce as you would have abide all Winter. Gather Olitory Seeds, and clip and cut all such Herbs and Plants before Full Moon, within an Handful of the Ground.

Flower-Garden.

Gather Seeds of Shrubs which you find ripe. Now is the Season for the budding of Orange Trees, inoculate therefore at the Beginning of this Month. Take up bulb Roots of Lillies, &c. dry them and lay them up. Plant some Anemony Roots to have Flowers all Winter. Now earth your Pots of Auricula's, transplant and divide their Roots into a light rich Earth. Sow Larks-heel, Columbines, Iron coloured Fox-gloves, Holly-hocks, &c. About *Bartholomew-tide* is the only secure Season for removing and laying your Perennial Greens, Oranges, Lemons, Myrtles, Phillyrea's, Oleanders, Jessamines, Arbutus,

Arbutus, and other rare Shrubs, as Pomegranates, Monthly Roses, and whatever is obnoxious to Frosts.

S E P T E M B E R.

Orchard and Kitchen-Garden.

IN dry Weather gather such of your Winter Fruits as are ripe, and daily pick up the Wind-Falls. Release inoculated Buds. Sow Lettuce, Radish, Spinage, Colliflowers, Cabbages, &c. and Winter Herbs and Roots. Transplant most eating and physical Plants. Plant Strawberries out of the Woods. Earth up your Winter Plants and Sallad Herbs, and plant forth your Cabbages and Colliflowers which were sown in *August*. Take up your Bees, and straiten the Entrances of such Hives as you leave.

Flower-Garden.

SOW Auricula's, Crocus's, Primrose and Cowslip Seeds. Stake your Autumnal Flowers and Plants. Take off Gilliflower Layers, Earth and all, and plant them in Pots or shady Borders. About *Michaelmas*, if the Weather be fair and not foggy, carry your choice Greens, and rarest Plants, (being dry) into your Conservatory, ordering them with fresh Mould, taking away some of the uttermost, and, stirring up the rest, fill the Cases with rich and well digested Soil, leaving the Doors and Windows still open, and giving them much Air, so the Winds be not sharp or Weather foggy. Shut them up by degrees, as the Cold increaseth. Myrtles will endure abroad near a Month longer. Set such Plants as will not endure the House, into the Earth, the Pots two or three Inches beneath the Surface, covering them with Glasses cloathed with sweet and dry Moss; but upon warm Days and sunny Showers uncover them.

O C T O B E R.

Orchard and Kitchen-Garden.

Trench Ground for Orchard and Kitchen-Garden. Plant or transplant all Sorts of Fruit-Trees, having lost their Leaves, and that so soon as they fall; but take no Trees for the Wall of above two Years grafting. Lay bare the Roots of old unthriving or over hasty blooming Trees. Ga-
F ther

ther Fruit remaining (Weather dry) in the Decrease of the Moon; plant and quash Quicksets. remove Grafts after the second Year, except Dwarfs, which may stand till the third. Set Fruit Stones three Inches deep, the sharp End uppermost, and cover them with Fern or Straw, which take off at Spring. You may yet sow *Genoa* Lettuce, which will last all the Winter, Radishes, &c.

Flower-Garden.

House your Hyacinthus Tuberoses. Continue sowing what you did last Month, if you please. Set your choice Tulips. Plant some Anemonies and Ranunculus's, which cover from the Frosts, but give them Air in all temperate Intervals. Remove your best Gilliflowers to shelter, from much Rain. All Sorts of bulbous Roots may now be safely buried. Beat, roll, and mow Carpet-Walks, and Camomile. Finish your last Weeding.

N O V E M B E R.

Orchard and Kitchen-Garden.

Plant young Standard and Wall Trees, and furnish your Nursery with Stocks to graft on the following Year. Continue your setting and transplanting Trees. Turn your Melon Ground, mixing it with rich Earth, and lay it in Ridges against Spring. Trench Ground for Artichokes. Sow and set early Pease and Beans. Lay up in Cellars for spending, and for Seed, Carrots, Turneps, Parsneps, Cabbages, Colliflowers, &c. Crop Asparagus, covering it with long Dung, and make Beds to plant in Spring. Take up your Potatoes for Winter spending.

Flower-Garden.

SOW Auricula Seeds. Plant fibrous Roots, Roses, Althea Frutex, Syringa's, Pionies, &c. If the Weather require it, quite enclose your tender Plants in your Conservatory, and if it freeze in the House, kindle some Charcoal, and when it hath done smoaking, put it in a hole about the middle of the Floor. In a Sunshiny quiet Day you may shew them the Sun thro' the Glass, but enclose them again before the Sun be gone off. Be very sparing in watering them, but if they become extreme dry, and it do not freeze,

you

you may with Care refresh them with a little Water, mingled with Sheep or Cow Dung. Never give your Aloes or Sedums a Drop of Water all the Winter; but if your Aloes grow manifestly too dry, you may recover them by exposing them a little to the Air in a fair Day. Plant Forest Trees for Walks, &c.

D E C E M B E R.

Orchard and Kitchen-Garden.

PLant Vines and Stocks for Grafting. Prune and nail Wall Fruit (which you may defer a Month or two longer) and Standard Trees. Set all Sorts of Kernels, Stones, &c. Trench Ground and dung it for Borders, &c. Turn and refresh your Autumnal Fruit.

Flower Garden.

SET up Traps for Vermin. Preserve your Anemonies, &c. from too much Rain or violent Frosts. Keep the Doors and Windows of your Conservatory well matted. In open Weather set your best Ranunculus's in a Bed of rotten Thatch or Straw, with good Mould above and below; and set your best Anemonies in a little rich loamy Earth, sifted through a Wire Riddle. Preserve your Fountain-pipes from cracking with Frost, by covering them with warm Horse-Litter.

When

When Wheat is at 5 Shillings per Bushel, then the Corporation Baker's Penny Wheaten Loaf is to weigh 11 Ounces Troy, and three Half-penny White Loaves the like Weight; and the Household Penny Loaf is to weigh 1 Pound, 2 Ounces, and 14 Penny Weights Troy; and so for a greater or lesser Weight proportionably. And if a Baker wants but 1 Ounce in 36; for the first, second, and third Fault he may be amerced; but for the fourth he is to stand in the Pillory without Redemption.

Gold to Silver is in Proportion as 12 to 1, and the Value of both in England is as follows: One Penny Weight of Angel Gold is worth 4*s.* 2*d.* 2*f.* Of Crown Gold, 3*s.* 10*d.* 2*f.* and of Sovereign, 3*s.* 6*d.* 2*f.* The Standard of Sterling Silver is 11 Ounces and Two Penny Weight of fine Silver, and 1 Penny Weight of Alloy of Copper, so that 12 Ounces of pure Silver without any Alloy, is worth 3*l.* 4*s.* 6*d.* and an Ounce 5*s.* 4*d.* 2*f.* But with Alloy, the Pound is worth no more than 3*l.* and the Ounce 4*s.*

The Standard for Gold is in the Pound Troy 11 Ounces of fine Gold, and 1 Ounce of Alloy.

Our Gold is of equal Finess with the Spanish, French, and Flemish; but our Silver Coin has less of Alloy in it, than either French or Dutch.

Fineness of Gold is esteemed by the Caract, which is 24 certain Weight, but the 24th part of any Quantity, and is divided into Grains and Parts; as the 24th part of the Pound Troy, and then 2 Penny Weight 12 Grains Troy make a Caract Grain, and 4 of such Caract Grains make a Caract, and 24 Caracts make a Pound Troy, or the 24th part of an Ounce Troy; and then 5 Troy Grains make 1 Caract Grain, and 4 Caract Grains make a Caract, and 24 Caracts make 1 Ounce Troy. The Caract which weighs Jewels is divided into 4 Grains, of which 20 make a Penny Weight Troy.

Several Foreign Gold and Silver Coins, assayed in the Mint, and rated as Bullion.

A TABLE

For the ready casting up any Number of Farthings, Half-pence, Pence, or Shillings, where may be found by Inspection, what the Great Hundred comes to at any Rate the Pound, from one Farthing to five Shillings.

The Use and Explanation.

Example 1. *If 1 Ell of Canvas cost 7 d. 2 f. What will 500 Ells cost?*

Seek for *Seven-pence Half-penny* at the Top of the Page. Then seek for 500 (the Number of Ells in that, which you will find in the third Column) and against it is 15 *l.* 12 *s.* 6 *d.* and so much will 500 Ells of Canvas cost at 7 *d.* 2 *f.* the Ell.

Example 2. *If a Pound of Sugar cost 4 d. 2 f. What will 2 C. Weight Averdupois cost?*

Seek in the Page whose Title is *Four-pence Half-penny*, for 224 (there being so many *Nett Pounds* in 2 C. *Averdupois*) and against it you will find 4 *l.* 4 *s.* which answers the Question.

Example 3. *If 5 C. Weight Averdupois of Soap cost 4 *l.* 1 *s.* 8 *d.* What did 1 Pound cost?*

Seek in the Table till you find 4 *l.* 1 *s.* 8 *d.* against 560 (the *Nett Pounds* in 5 C. *Averdupois*) and at the Top of the Page you have the Answer; viz. *Seven Farthings.*

Note, That the first and third Columns in this Table are the Multipliers (where you must look for the Number of Yards, Ells, Pounds, &c. you would know the Price of at the Rate mentioned on the Top of the Page) and the second and fourth shew the Value of the Sum multiplied in all Pages from a Farthing to five Shillings; but afterwards the first Columns only contain the Multipliers, and the other three shew the Value of the Sum multiplied: Also that the Numbers within a Parenthesis relate to the Great Hundred; as (28) (56) (84) (112) &c. are the Quarter, Half, Three Quarters, and whole Great Hundred, &c.

*The Price of any Thing, at
One Farthing.*

The *Interest*, or *Rebate* of any Sum of Money, at 5 per Cent. Simple Interest, from 1 Month to 1 Year, at 4 and 5 per Cent.

1. Example of *Interest*.

What doth the Interest of 330 l. amount to at the End of 5 Months.

I SEEK in those Pages intituled, *Simple Interest* at 5 per Cent. for the Column which hath 5 Months at the Top; and in that Column for the Sum against 300 and 30 (because it cannot be found at once) and find that the Interest of

300 } forborn 5 Months, amounts to	6	5	0
30 }		12	6
330	6	17	6

The same Method will do for 4 per Cent.

2. Example of *Rebate*.

What is the present Worth of 200 l. due at the End of 7 Months, at 5 per Cent.

I seek in those Pages intituled, *Discount or Rebate* at 5 per Cent. for the Column that hath 7 Months at the Top, and in that Column against 200 l. I find 194 l. 3 s. 4 d. which answers the Question.

Dd

Interest of Money for Days.

TO find the Interest of any Sum of Money, for any Number of Days, at any Rate of Interest the Rule is,

Multiply the Principal by the Rate, and the Product by the Number of Days, and it gives a Dividend; which divided by 36500 (the common Divisor for all Rates) answers the Question.

Example 1. *What is the Interest of 500l. at per Cent. for 200 Days?*

The Principal 500
The Rate 5

2500
Days 200

Common Divisor 36500) 500000 (13,6986
Answer 13l. 13s 11d. $\frac{1}{2}$

Example 2. *What is the Interest of 1000l. at per Cent. for 365 Days?*

Principal 1000
Rate 8

8000
Days 365

Common Divisor 36500) 2920000 (80l. Answer

And thus may you readily find the Interest of any Sum of Money, at any other Rate, for any Number of Days.

SHEWING,

- I. What an Annuity, Rent, or Pension, forborne any of those Numbers of Years amounts to.
- II. What an Annuity to continue any of those Numbers of Years, is worth in ready Money.
- III. What Annuity any Sum of Money will purchase to continue any of the abovesaid Numbers of Years.

Note, That you have two Years instead of one Year purposely set down in the *Forbearance of Annuities*, because the Annuity is not due till the End of one Year, and therefore cannot be considered as forborne that Time.

THese Tables are so plain in themselves, that they need no Examples to illustrate them; but because Questions only of the particular Year mentioned at the Top of each Column can be solved by them, I shall in the next Page insert a Table, whereby you may try any Number in the foregoing Tables, and answer any Question belonging either to *Forbearance*, *Discompt*, or *Purchase of Annuities* (as also to the *Rebate of Money*) at 5 per Cent. Compound Interest, for any Number of Years not exceeding 40: To do which, this is the Rule.

Multiply that Number in the Tables which stands right against the Number of the Years proposed, and the Column to which the Question belongs, whether of Forbearance, Discompt, or Purchase of Annuities (or Rebate of Money) by the Annuity to be forborne, discompted, or purchased, or by the Sum to be rebated, and the Product will be the Answer in Pounds and Decimal Parts,

One Example will be sufficient to explain the whole Table, which shall be this.

If 500 l. Annuity be forborne 21 Years, what will it amount to?

Tabular Number against 21, and under *Forbearance of Annuities*. } 35,71925

Annuity forborne _____ 5

17859,62590

Answer, 17859,6259000; or 17859 l. 127. 6

To find the foregoing Fraction .3625 by this Table you must do thus: Seek for the *Decimal Fraction* the Table that is nearest to it, (since you cannot once find all the Figures) which is .35; against which on the Left-Hand you have the Value of it, *viz.* 7 subtract this from .3625; and there will remain .0125, which being found in the Table, against stands 3 *d.* which added to 7 *s.* gives 7 *s.* 3 *d.* the Value of .3625 of a Pound.

And thus you may find the Value of any Fraction of a Pound by this Table.

I. *Note*, That for every Letter or Parcel, from any of the above-mentioned Places to London, you are to pay one Penny each at the Receiving House; and nothing at London: But from London to the abovesaid Places, the Messengers are allowed to take for each Letter or Parcel, not exceeding a Pound, one Penny, and no more.

II. And considering divers of these Places are remote, It is desired you put in your Letters and Parcels before Six of the Clock over Night at the Receiving Houses, from whence they will be Collected and brought into their proper Offices; because divers of the Country Messengers go on their Walks by Six of the Clock next Morning, and thereby will gain a Day's Time in the Delivery: But for those Places that are nearer, Letters are Collected and Delivered two or three Times a Day.

III. And it is further Notified, that all General Post-Letters both Foreign and Domestic, are convey'd from the abovesaid Offices directed to the Towns abovementioned, every Day at Twelve o' Clock: And Answers thereunto being put into the Receiving Houses in the Country Towns, will next Night be safely put into General Post-Office.

The TABLE of ROADS described

The first Column contains the Names of Places wherein Cities are in Black Letters, as in *Berkshire* Road, *Box*, &c. and Market Towns in *Italick*, as *Huddersdon*, &c. The Letters after them shew the Days their Markets are kept on. A Figure in any Place, directs to another Road that branches off from that Place, as from *Puckridge*, marked (1) a Road goes to *Barkway*, &c. and from *Barkway* in *Norwich* Road, marked [2] a Road goes to *Foulness* &c. The second Column shews the Distance of one Place from another, and the third, the Distance of each from *London* in computed and measured Miles. *c. m.* stands for computed, and *m. m.* for measured Miles. The two last shew the County, Hundred, and Lath, &c.

The

The Names of the Counties, Cities, Corporations,
Borough Towns, and Stewarties in Great-Britain

Rules, Orders, and Rates of Hackney Coachmen.

BY an Act of Parliament made in the Fourteenth Year of our late Sovereign Lord King Charles II, it is appointed, that no Hackney-Coachman shall presume to take for his Hire, in or about the Cities of London or Westminster, above 10 Shillings for the Day, reckoning 12 Hours to the Day; and by the Hour, not above 18 Pence for the first Hour, and 12 Pence for every Hour after: Nor for his Hire from any of the Inns of Court, or thereabouts, to any Part of St James's or Westminster (except beyond Tottil-street) above 12 Pence, and the like from the same Places to the Inns of Court, or thereabouts; nor from the Inns of Court, or thereabouts, to the Royal Exchange, more than 12 Pence; but if to the Tower, Bishopsgate-street, Aldgate, or Places thereabouts, 18 Pence; and so from the same Places to the said Inns of Court, as aforesaid. That the like Rates be observed, from, or to, any Place at the like Distance with the Places before named. That if any Coachman shall refuse to go at, or exact more, for his Hire than these Rates, he shall, for every Offence, forfeit 10 Shillings.

This Act is expired, but another was made in 5th and 6th Years of William and Mary, the refections and Penalties the same as the other.

The Number of Coaches is 800, 50 l. Fine, and 4 l. per Annum, for a Licence for 21 Years.

All Licences are assignable, or may be bequeathed by Will, and accounted Assets. An Entry shall be made by the Commissioners, without any Fee.

248 *Rules of Hackney Coachmen.*

Every Legatee, Executor, &c. claiming Title, shall, within 60 Days, produce before the Commissioners such Probate for Letters of Administration.

Any Hackney Coachman using the Trade without a Licence, forfeits five Pounds.

That no Horse, Gelding, or Mare, be under 14 Hands in Height.

That every Coach shall have a distinct Figure to be known upon any Complaint.

No Person to have more than two Licences.

That no Person use another's Figure, or deface his own, upon the Penalty of Five Pounds. One Moiety to the Informer, and the Clerks to have 2 s. 6 d. for engrossing such Licence.

All Fines, Forfeitures, and Penalties, due and payable by Virtue of this Act, shall be levied by Distress of the Goods and Chattels of the Offender, by Warrant from the Commissioners, or any three, to be sold within ten Days, and the Overplus to be returned to the Owner; and in default of Distress, the Offender, by Warrant from the Commissioners, to be committed to Prison, without Bail or Main-prize.

One 4th of the Number, viz. 200, to ply every Sunday. Any one plying that is not in his Turn, forfeits 5 l. to be recovered by any Person that will sue for it. Complaints are heard every Thursday at the Office in Surry Street in the Strand.

N. B. Any Person may agree cheaper if he can.

By another Act made the second Year of her late Majesty Queen Anne, the major Part of the Commissioners (authorized under the Great Seal) are empowered to Licence for 32 Years, from June 24th 1715, 800 Hackney Coaches to drive within the Parishes and Places comprized within the Weekly City of Mortality. Each Coach to be marked with

Number on Tin Plates, of the Breadth of 6 Inches and a Quarter, and the Length of 9 Inches and a Half, to be fixed on each Side of the Coach: and every Proprietor to pay the Weekly Sum of 5 Shillings, to be paid Monthly to the Receiver of the Office. Subject also to the former Rules and Orders.

ORDERS for Carmen.

THE *Carmen*, for the foregoing Rates, are to help, load and unload their Cars.

If a *Carmen* exacts more than these Rates, upon due Proof before the Lord-Mayor, or any two Justices of the Peace, he shall suffer Imprisonment for the Space of 21 Days, without Bail or Mainprife.

If any Merchant, or other Person shall refuse to pay a *Carman* for his Hire, after these Rates, upon Complaint made by the *Carman* to the *President* of *Christ's Hospital*, or any Justice of the Peace, the *President* or Justice may oblige them to do it.

All Merchants, or others, may chuse what Car they please, except such as stand for Wharf-work, Tackle-work, Crane-work, Shop and Merchants Houses, which are to be taken in Turn.

Every *Carman* standing with his empty Car next to any Goods to be loaden, shall, upon the first Demand, load the same, without bargaining for any other Wages than the Rates before-mentioned.

If a Merchant, or other Person, shall cause a *Carman* to attend at his House, Shop, Warehouse, or Cellar, with his loaden Car above half an Hour before he unloads, (the *Carman* being willing to help unload the same) he shall pay the *Carman* after the Rate of 12 Pence for every Hour, after the first half Hour, for his Attendance.

Every licensed *Carman* is to have a Piece of Brass fixed upon his Car, upon which is to be set a certain Number, which Number (together with the *Carman's* Name) is registered in a Register kept in *Christ's Hospital*; that so if any *Carman* offends, it is but taking notice of the Number of his Car, and search for that in the said Register, and you will find his Name.

Every *Carman* that shall not conform to these Rules, or work without a numbered Piece of Brass fixed on his Car, may be suspended from his Employment.

Complaints of the Abuses of *Carmen* may be made every *Tuesday*, at Two of the Clock in the Afternoon, to the Court sitting in *Christ's Hospital*.

*The Rates or Fares of Watermen, as they
were set forth by the Lord Mayor and
Court of Aldermen.*

TABLES

In a shorter Method than

any hitherto Published.

Exactly Calculated

FROM

One Pound to Ten Millions of Money,

to the Thousandth Part of a Penny,

After the Rate of Three, Four, Five,

and Six,

Per Cent. per Annum.

By **Israel Falgate,** at the

BANK of ENGLAND.

L O N D O N:

Printed in the **YEAR MDCCLVI.**

DIRECTIONS.

Note, that by these *small Tables* is effected *all* that can be performed by those larger, which are calculated from Day to Day throughout the Year, and that to a *larger Sum* than any yet extant; no *Tables* hitherto published exceeding *Ten Thousand Pounds* for One Year, and these extending to above *Twenty-five Thousand*; as appears manifestly, because if you multiply 25000 by 365 Days, the Product will amount to but 9,125,000, and these *Tables* are calculated up to *Ten Millions*.

The Use whereof may be understood by observing this Rule;

Always to multiply the Sum by the *Number of Days*, or the *Number of Days* by the *Sum*; and the *Interest* of the *Product* may be found in these *Tables*, as is apparent by an Example, viz.

To find the Interest of 5654 *l.* for 154 Days, at the Rate of 6 *per Cent. per Ann.* multiply as before directed, and, the Product will be 8 Hundred and 70 Thousand 7 Hundred and 16 Pounds: And that Sum for One Day required the same Interest as 5654 *l.* doth for 154 Days, which will appear by the *Tables*.

143 : 2 : 7 532

Which Sums being added, sheweth, That 870716 l. Principal for 1 Day at 6 per Cent. requireth — l. 143 : 2 : 7, which is the true Interest of 5654 l. for 154 Days.

And, whereas there is a Difference in the common Way of computing Quarterly Interest by 3, 6, and 9 Months, and by single Days, the same may be thus rectified, allowing each a true Proportion of the Year, being Three Hundred Sixty Five Days, viz. 3 Mon. 91 Days and $\frac{1}{4}$ 6 Mon. 182 Days $\frac{1}{2}$, 9 Mon. 273 $\frac{3}{4}$. To either of which, if you add the remaining Days that exceed 3, 6, or 9 Months, and multiply the Sum by the Number of Days, and add $\frac{1}{4}$, $\frac{1}{2}$, or $\frac{3}{4}$, of the principal Sum, for $\frac{1}{4}$, $\frac{1}{2}$, or $\frac{3}{4}$, of a Day to the said Product of whole days, the Interest being found in these Tables as before, will agree with the common, though uncertain Way of reckoning, by 3, 6, or 9 Months; by Reason they differ One from the Other 3 Days, in 3 Months; one 3 Months containing but 89, and others 92 Days.

T A B L E

Computed for 3, 6, 9, and 12 Months
Interest of 100 Pounds in Shillings.

Rate of Interest per Cent.	3 Mon.	6 Mon.	9 Mon.	12 Mon.
	Shill.	Shill.	Shill.	Shill.
1	5	10	15	20
2	10	20	30	40
3	15	30	45	60
4	20	40	60	80
5	25	50	75	100
6	30	60	90	120
7	35	70	105	140
8	40	80	120	160
9	45	90	135	180
10	50	100	150	200

By which the Quarterly Interest of all Sums of Money may expeditiously be found at the following Rates, viz.

1, 2, 3, 4, 5, 6, 7, 8, 9, and 10,
per Cent. per Annum.

The Rule is, Multiply the Sum proposed, by the Interest in the Table under the Time, and against the Rate required; and divide the Product by 100, with cutting off two Figures to the Right-hand, and you have the Interest in Shillings: Then multiply the Remainder of the Shillings by 12, and divide the Product by 100, it will give you the Pence; and

M m the

the Remainder of them multiplied by 4 and divided by 100, will give you the Farthings.

Example.

172 Pounds for 9 Months, at 6 per Cent. per Annum.

Multiply 172 the Principal,
by 90 the Interest in Shill.

s Shill. 154 | 80

12

Pence 9 | 60

4

Farthings 2 | 40

By which it appears, the Interest is 15 Shillings, 9 Pence, two Farthings, and $\frac{4}{100}$ of a Farthing.

or, $l. 7 : 14 : 9 \frac{1}{2} \frac{2}{5}$.

Quarterly Interest may also be found in this Book, by proportioning the Time truly thus, reckoning,

$\left. \begin{array}{l} 91 \text{ Days and } \frac{1}{4} \\ 182 \text{ Days and } \frac{1}{2} \\ 273 \text{ Days and } \frac{3}{4} \end{array} \right\} \text{to be } \left\{ \begin{array}{l} 3 \text{ Months.} \\ 6 \text{ Months.} \\ 9 \text{ Months.} \end{array} \right.$

Which are truly Quarterly Proportions a Year, viz. $\frac{1}{4}$, $\frac{1}{2}$, and $\frac{3}{4}$ of 365 Days

To either of them add the Days that exceed 3, 6, or 9, Months, and proceed as directed in the Beginning of this Book you will have the Interest of the Quarter and Days, at one Operation, which the true Number of Days, taken as they fall will differ from, by Reason three Months contain sometimes but 89, and at other times 92 Days.

The even Hundreds are to be found at the Top of the Table, having their Dominical Letters over them, and are all Leap Years, as 700, 1400, 2100, and 2800, have DC. The Parts of an Hundred are to be found in the Side, and have their Dominical Letters against them in the first Column, as 28, 56, 84, have DC; 1, 29, 57, 85, B; 2, 30, 58, 86, A, &c. To find the Dominical Letters for even Hundreds and Parts, the Rule is; Seek the Hundreds in the Top, and the Parts in the Side, and in the Angle of Meeting is the Dominical Letter, or Letters; so the Dominical Letter for 1742 is C, for 1743 B, 1744 AG, it being Leap Year; A being used only till February 25, and G all the rest of the Year.

Having found the Dominical Letter and Prime for any Year you desire, seek for the Prime in the Square next the Dominical Letter, and in a straight Line to the Right Hand under from Christmas to Shrove Sunday, you have the Weeks and Days from Christmas to Shrove Sunday; and under Shrove Sunday, the Day of the Month Shrove Sunday happens on; and in the last Column (under the Title Easter Day) you have the Time of Easter. Example, For 1743 the Dominical Letter is B, and Prime 15. I seek for 15 against B, and in that Line find 7 Weeks 1 Day the Time between Christmas and Shrove Sunday, and that Shrove Sunday is on February 13, and Easter Day on April 3, for that Year. For 1744, Dominical Letters AG, and Prime 16. shews only 6 Weeks from Christmas, and that Shrove Sunday February 5, and G that Easter Day is March 25.

This Table is but a Continuation of the former, and after the same Method shows Rogation Sunday, Ascension Day, Whitsunday, Trinity, and Advent Sunday. Example: For 1743, B being the Dominical Letter, and 13 the Prime, shews Rogation Sunday is on May 8; Ascension Day, May 12; Whitsunday, May 22, &c. Again, 1744, the Sunday Letters (it being Leap Year) are A C, but the former serving only till February 25, I take G, and seek for the Golden Number 16 against it; and guiding my Eye to the Right-Hand, find Rogation Sunday to be on Apr. 29, Ascension Day on May 3, Whitsunday on May 13, &c. In the same Manner, by the next Table, you may find the Moveable Terms for ever. Example: In 1744, Easter Term begins Apr. 11, and ends May 7; and Trinity begins May 25, and ends June 13.
